

*Imagine*  
Imagine transforming the micro world  
into rich images all can share...

Welcome to CapSure®

# CapSure®

## Advanced Imaging Software for Microscopy

Imagine a software system that can transform basic microscopy into a more efficient, more effective and more valuable experience. Imagine a tool that will turn time consuming microscopy processes into nothing more than a click of a mouse. Imagine sharing live microscopic images, in real-time with individuals around the globe. Your imagination is now reality...

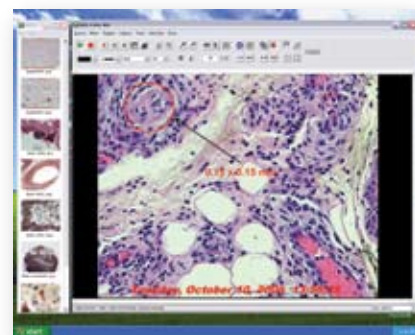

Welcome to CapSure®

CapSure improves the efficiency and effectiveness of key functions:

### Information Management

- Digitally archive images for easy distribution between locations
- Improve accuracy and security by automatically imbedding time stamps
- Increase productivity through automatic saving, naming and organization processes
- Reduce costs of errors and lost information by automating functions
- Create session folders that keep case files organized

Images are automatically saved, named and organized.

### Collaboration

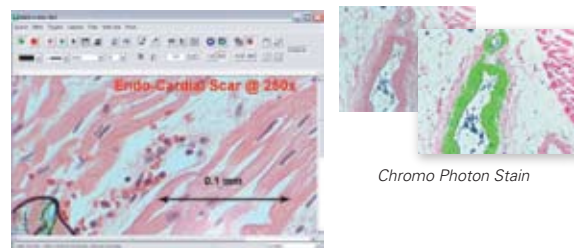

- Communicate in real-time, increasing effectiveness of consultations
- Share live images from your microscope with a broadband connection
- Improve access to offsite professionals in a timely manner
- Decrease waiting time for lab results
- Create valuable training and educational opportunities
- Reduce the cost of travel between facilities
- Eliminate risk of breakage, loss or damage due to slide transport

Live collaboration with voice, video and microscopic images

### Image Enhancement

- Imbed measurements on live video and captured images
- Zoom in and out, and pan around images on screen without having to change objectives
- Eliminate the need for post editing of images
- Change the color properties of images
- Digitally manipulate images with no damage to the specimen

Label, time stamp and change the color of images.
