**GlobalMedia Unveils ClearMic™  
Echo-Cancellation Technology for Videoconferencing Applications**

**Scottsdale, Ariz. USA April 1, 2003** – GlobalMedia Group, LLC (GMG), a leading designer and developer of audio and video communication hardware, today introduced the new iREZ® “ClearMic”™ Acoustic-Echo-Cancellation (AEC) microphone system. The ClearMic offers seamless integration into one of several iREZ® cameras, or can easily operate on a stand-alone basis with any camera interface solution. ClearMic’s unique design eliminates the echo that commonly occurs during hands-free voice over IP and video conferencing communications. While eliminating echo, ClearMic also minimizes the noise and “chatter” often associated with the video conferencing experience.

ClearMic’s innovative functionality has been enabled by GlobalMedia’s engineers utilizing sophisticated algorithms combined with a high-speed, 32 “MIPS” DSP (Digital Signal Processor) to “cancel out” the feedback loop heard during video and audio conference calls. In addition, ClearMic™ “filters” the audio signal from static noises for the clearest and highest-quality sound possible.

“At a time when daily communications are essential if not critical to both our business and personal interactions, our focus at GlobalMedia is to design and develop experience-enhancing products with the user’s total video-communication needs in mind.” said Joel E. Barthelemy, GMG’s president. “We have once again accomplished this with our ClearMic design, both from the solid internal circuit functionality, and in how the industrial-designed surface aesthetically flows into our various iREZ® cameras and armature. Our customers want a fully integrated solution, and ClearMic is simply a perfect fit with our expanding product lines in supporting these growing needs.”

ClearMic lists for \$299 in single quantities, and under \$400 for a complete video and audio solution, representing an extremely cost-effective choice for companies seeking professional video communication products. For more information about ClearMic, or to order the products, visit the web site at [www.globalmedia.com](http://www.globalmedia.com).

Headquartered in Scottsdale, Arizona, GlobalMedia Group, LLC ([www.globalmedia.com](http://www.globalmedia.com)) is a leading designer, innovator and developer of audio and video communication hardware. The Company's products, which are sold globally primarily through Original Equipment Manufacturers (OEMs) and distributors, merge function and design with video communications for multiple channels, including but not limited to business to business presentations, training, education, point to point and multi-point videoconferencing, Internet broadcasting, telemedicine and security .
