Polycom Receives First Shipment of State-of-the-art Web Cameras from GlobalMedia

GlobalMedia now providing their new K2 web cameras to Polycom customers

Scottsdale, AZ – September 30, 2005 – GlobalMedia Group, LLC, a leading innovator of visual communications products based in Scottsdale, Arizona, has sent its first large shipment of their **K2** cameras to Polycom, the world's largest provider of video conferencing systems. The **K2** provides individuals and companies utilizing desktop video conferencing, with a small portable camera that produces quality video at an affordable price.

“The fact that Polycom, the largest supplier of high quality teleconference equipment in the world, is offering our camera to their customers, adds to a number of recent satisfying developments for GlobalMedia,” said Joel E. Barthelemy, CEO of GlobalMedia. “We’re proud of our team of dedicated designers and engineers, who have developed this exciting camera.”

The addition of state-of-the-art **K2** cameras will provide Polycom's desktop video conferencing customers superior performance. This latest innovation from GlobalMedia not only provides excellent video quality, it's also affordable, and is versatile for many applications. Joe Baltes, sales engineer at RadVision remarked, "The K2 camera from GlobalMedia is GREAT. I am in love with this thing. I will be recommending this camera to all my customers".
