

GlobalMedia Unveils USB Live New Edition! Multi-Platform Audio and Video Capture

Scottsdale, AZ USA December 3rd, 2002 - GlobalMedia Group, LLC (GMG), a leading designer and developer of audio and video communication hardware, today re-introduced the iREZ® USB Live New Edition! This product is an ideal way for the novice and expert to bring live video, audio and still images into the computer from various standard video sources, such as analog video cameras, camcorders, VCRs or TV tuners. The product includes free Arcsoft Video Impressions software valued at \$39.99.

“With all the operating systems in the market today, including PC and Mac, we are pleased to provide a solution that works in Windows 98, 2K and XP, as well as Mac OS9 and OSX.” said Joel E. Barthelemy, GMG’s President.

The USB Live New Edition! addresses the growing demand for sophisticated computer-based multimedia presentation devices that will capture video and audio, while offering end-users tremendous ease of use. The product enables full-multimedia presentations and movies to be produced on any USB equipped Mac or PC computer, including OSX and XP. The USB Live New Edition! has an MSRP of \$99.95.

Specifications are as follows:

Operating Systems Supported: Mac OS 9.x, OS X, Windows 98, ME, 2000, XP
Audio Inputs: Cable included that connects from external device to PC/Mac soundcard
Video Inputs: S-Video, Composite RCA Jack
Image Resolution: SQCIF, QCIF, CIF (80x60, 160x120x 320x240)
